

Ideal Pool layout

Consider which direction is the prevailing wind coming from? The Skimmer should therefore face into this wind so that contaminants sitting on the pool's water surface (leaves, dust) are blown towards the Skimmer end.

Locate the Pump shed nearest the Skimmer end not Eyeball end.

Lights located on the house side to illuminate the water beautifully, and not place glare onto the home's occupants.
2 lights suggested on * & 10 metre pools, 3 lights suggested on 12.5 metre pool.
